

Brief Organizational History

Salisbury Behavioral Health, Inc., d.b.a. Milestones Community Healthcare of Montgomery County, was awarded the first pilot project to provide peer specialist services in the State of Pennsylvania. Our Montgomery County program recently had their service description reviewed and approved by OMHSAS. After three years of partnering with Montgomery County for funding, they are in the process of contracting with their Managed Care Organization to assume the financial liability. Throughout the three years they have been operating this program, they have employed four full time certified peer specialists, one of which supports the individuals that are served through our Deaf Services Center. The team of Certified Peer Specialists has served over 80 individuals since the programs inception. Our agency has recently started an additional Certified Peer Specialist program in Carbon, Monroe and Pike counties this past July. There are presently four Certified Peer Specialists employed, three part time and one full time, serving eighteen peers.

A Certified Peer Specialist Program was started in February 2008 in Lehigh and Northampton Counties. It employs a full time supervisor, one full time CPS and one part time CPS and is growing rapidly. It is funded through Magellan Behavioral Health.

Certified Peer Specialist Job Opening

Salisbury Behavioral Health, Inc. is searching for Certified Peer Specialists to work in the Lehigh Valley area. CPS services are community based and provided in both Lehigh and Northampton counties. We are accepting applications and resumes for full time and part time positions in a rapidly growing program. Candidates must be certified as specialists and be willing work within the community.
